The International Symposium on the Analytic Hierarchy Process (ISAHp) for Decision Making brings together researchers, academics, students and other users of AHP/ANP to share their research and experiences in decision making.

The ISAHp is a biennial conference on multi-criteria decision analysis, with a particular focus the analytic hierarchy process (AHP) and its extension, the analytic network process (ANP), both developed by Thomas L. Saaty, and the combination/comparison of these with other methods.
